

Figure S1. Effect of the column length on silver-ion HPLC/APCI-MS analysis of TGs in the randomization mixture of OOO/LLL: (A) one 25 cm ChromSpher Lipids column, (B) three 25 cm ChromSpher Lipids columns connected in series. Chromatographic conditions are described in the Experimental section.

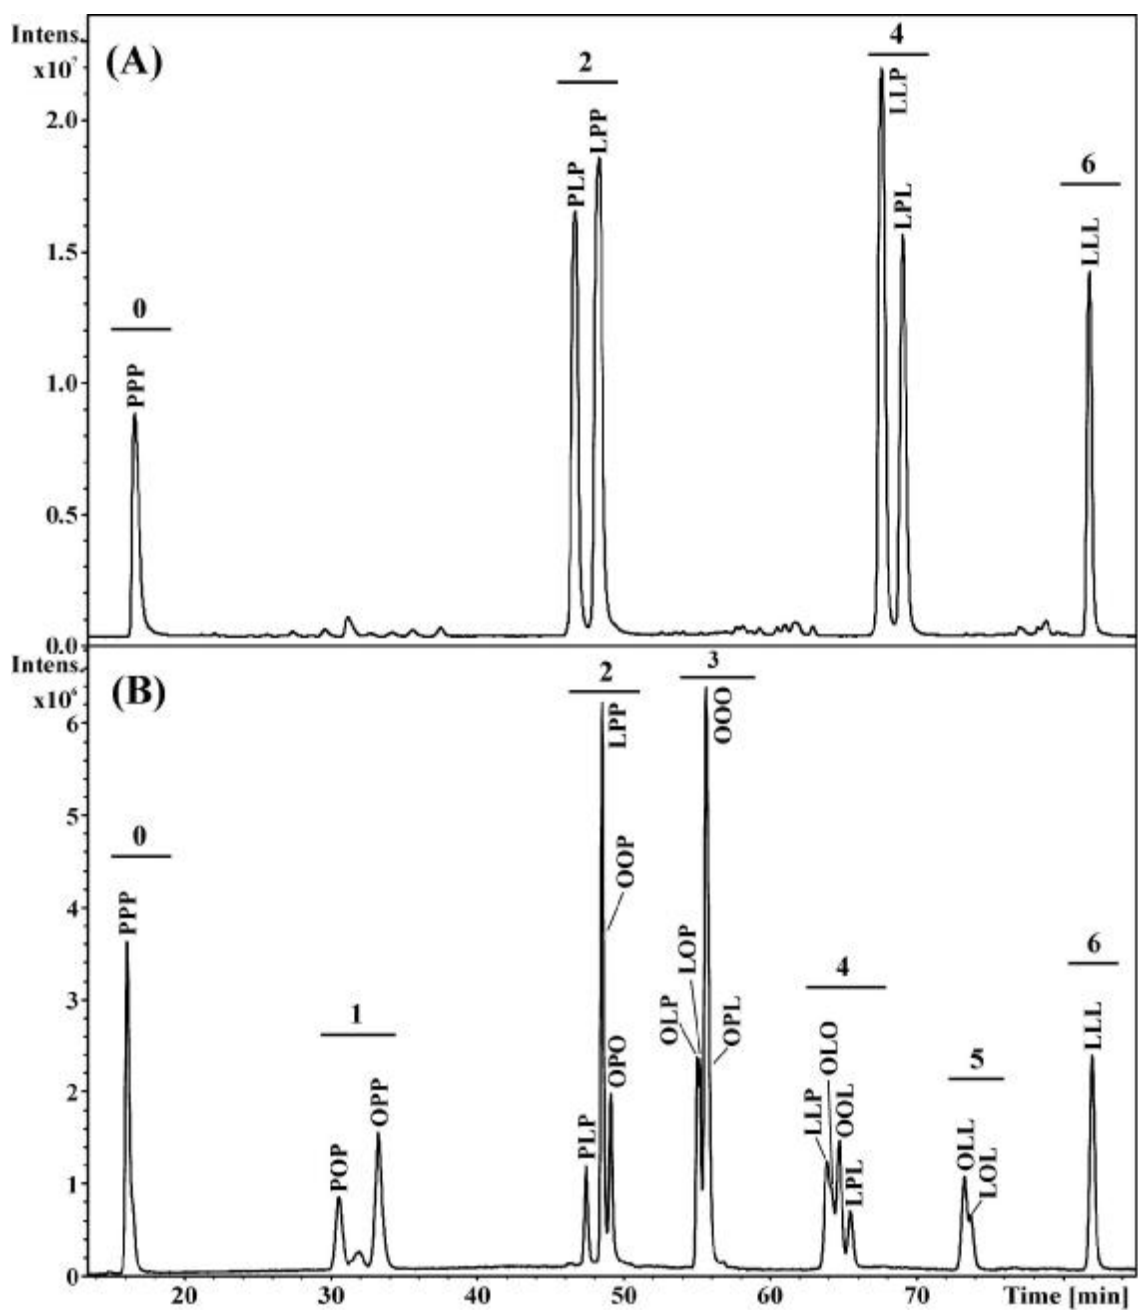

Figure S2. Silver-ion HPLC/APCI-MS analysis of randomization mixtures: (A) PPP / LLL, (B) PPP / OOO / LLL. Chromatographic conditions are described in the Experimental section.

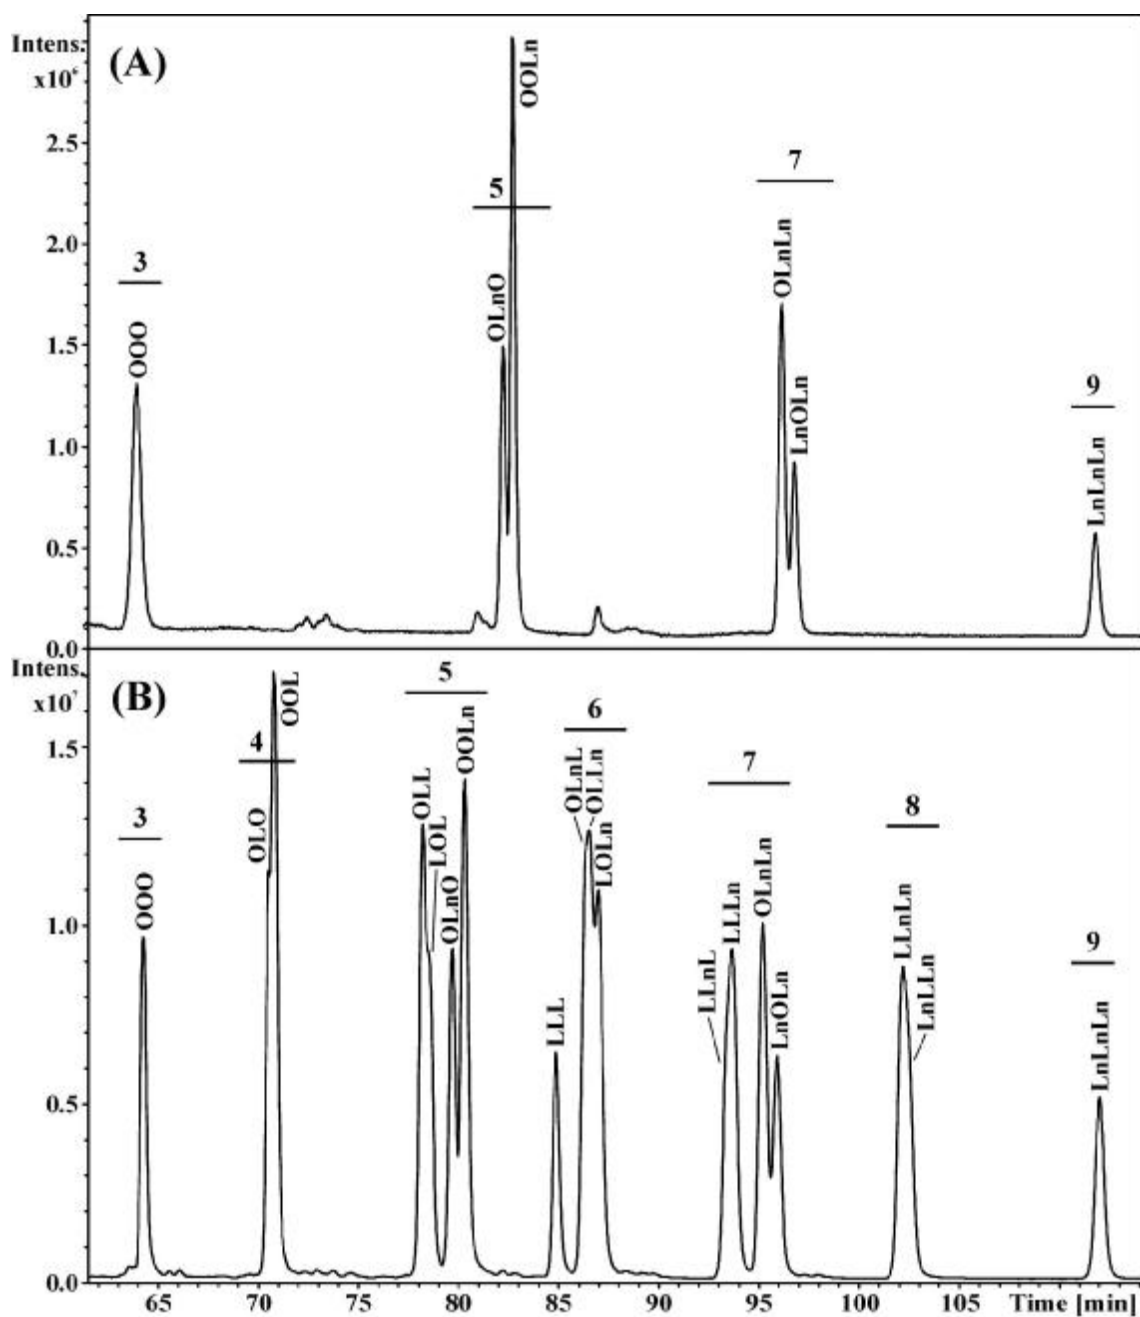

Figure S3. Silver-ion HPLC/APCI-MS analysis of randomization mixtures: (A) OOO/ LnLnLn, (B) OOO/ LLL/ LnLnLn. Chromatographic conditions are described in the Experimental section.
